

JEYAKRISHNAN PITCHAIKANI

Senior Solution Engineer @ Relevantz Technology Services
jkanin@gmail.com | +1-470-658-4914 | www.linkedin.com/in/jeypitch

Profile Summary:

Experience

- Senior Solution Engineer with **19+ years of experience** delivering enterprise applications across networking, telecommunications, banking, healthcare, and media, with a current focus on AI-enabled solutions.
- Hands-on experience integrating commercial and open-source AI platforms into enterprise applications and software engineering workflows.
- Developed **custom MCP servers and integrations** to make enterprise tools and services accessible through skills, plugins, and multiple AI development platforms.
- Worked on **proofs of concept and solution proposals**, translating customer requirements into technical approaches and demonstrations of business value.
- End-to-end delivery experience spanning requirements analysis, architecture, development, system integration, deployment, UAT, and production support.

Technical Expertise

- **AI Development Tools:** Cursor, Claude, GitHub Copilot, Amazon Kiro, and Windsurf, custom skills, plugins, and reusable AI-assisted workflows.
- **AI Integration:** Model Context Protocol (MCP), tool integration, and connectivity between AI assistants and enterprise systems.
- **AI-Driven SDLC:** Applying AI to requirements for analysis, design, coding, testing, documentation, and operational workflows.
- **Enterprise Knowledge and Graphs:** Neo4j and Cypher queries for knowledge modeling, dependency analysis, contextual retrieval, and onboarding.
- **Conversational AI and AWS:** Voice assistant development using Amazon Nova Sonic, with AWS services supporting application integration and backend workflows.
- **Backend and Architecture:** Java, Python, Spring, Spring Boot, Microservices, SOA, RESTful APIs, Hibernate, and MyBatis.
- **Front-End Development:** React.js, TypeScript, JavaScript, Node.js, AngularJS, HTML, CSS, SASS, Bootstrap, and jQuery.
- **Deployment and Data:** Docker, Ansible, Jenkins, Git, Oracle, MySQL, and enterprise database integration.
- **Design and Delivery Practices:** Agile methodologies, architecture documentation, technical specifications, effort estimation, and sprint planning.

Leadership & Professional Ability

- Collaborate with clients, product owners, architects, and subject matter experts to clarify requirements and align solutions with business priorities.
- Communicate solution value, architectural decisions, and technical tradeoffs to technical and executive audiences.
- Mentor engineers and guide technical decisions to improve maintainability, code quality, and effective adoption of AI tools.
- Prioritize deliverables, assess dependencies, and coordinate execution across development, testing, and operations teams.
- Apply structured analysis and hands-on troubleshooting to resolve complex application and integration issues.

JEYAKRISHNAN PITCHAIKANI

Senior Solution Engineer @ Relevantz Technology Services
jkkani@gmail.com | +1-470-658-4914 | www.linkedin.com/in/jeypitch

Skill Set:

AI Tools	Cursor, Claude, GitHub Copilot, Amazon Kiro, Windsurf; custom skills, plugins, and MCP servers for enterprise integration across AI tools
AI Platforms and Models	OpenAI, Anthropic Claude, Jev, Ollama, Amazon Nova Sonic; AI-driven SDLC, enterprise knowledge solutions, conversational AI, and voice assistants
Solution Architecture and Integration	Microservices, SOA, RESTful APIs, API contracts using OpenAPI and RAML, system integration, Apache Kafka, Apache Camel, JMS, and ActiveMQ
Application Engineering	Java, Python, TypeScript, JavaScript, Spring, Spring Boot, Node.js, Hibernate, MyBatis, and iBatis
Web and User Interface Engineering	React.js, AngularJS, HTML5, CSS3, SASS, Bootstrap, jQuery, Kendo UI, JSP, and Swing; reusable components and responsive application design
Data and Knowledge Architecture	Neo4j, Cypher queries, graph data modeling, dependency analysis, Oracle, MySQL, DB2, SQL Server, MongoDB, Vertica, and Redis
Cloud and Platform Engineering	AWS services and application integration, Docker, Ansible, Tomcat, JBoss, Nginx; deployment and operational support across Linux, Unix, Windows, and macOS
DevOps and Quality Engineering	Jenkins, Git/GitHub, Maven, Apache Ant, Gulp, Webpack, Playwright, JUnit, TestNG, Cucumber, Gherkin, Ruby, and Groovy; build automation, automated testing, and release support
Industry Domains	Network Security, Telecommunications, Healthcare, Banking and Finance, and Media

Education:

- Master of Computer Applications from Madurai Kamaraj University
- Bachelor of Commerce in Computer Application from Madurai Kamaraj University

Professional Experience:

Organization	Position	Period
Relevantz Technology Services Inc	Senior Solution Engineer	Jan 2023 - Till Date
ObjectFrontier Inc	Solution Engineer	Jan 2017 - Dec 2022
ObjectFrontier Inc	Software Programmer	Jun 2015 - Dec 2016
Object-Frontier Software Private Limited.,	Team Lead	Nov 2014 - May 2015
ObjectFrontier Inc	Software Programmer	Jan 2014 - Oct 2014
Object-Frontier Software Private Limited.,	Team Lead	Apr 2013 - Dec 2013
Object-Frontier Software Private Limited.,	Senior Software Engineer	Apr 2011 - Mar 2013
Object-Frontier Software Private Limited.,	Software Engineer	Oct 2009 - Mar 2011
Object-Frontier Software Private Limited.,	Jr. Software Engineer	Dec 2007 - Sep 2009
Object-Frontier Software Private Limited.,	Executive Trainee	Jun 2007 - Nov 2007

Project Summary:

Purchasing Power — Digital Brain Discovery

Role: Senior Solution Engineer | **Duration:** 6 Weeks

AI-focused discovery and proof of concept using Neo4j and custom Cursor skills to connect enterprise knowledge for onboarding, impact analysis, operations, and audit workflows.

- Analyzed codebases, documentation, and SME knowledge to identify use cases and information needs.
- Used Neo4j and Cypher queries to model and explore relationships across applications and dependencies.
- Created custom Cursor skills for contextual knowledge retrieval and persona-specific workflows.
- Supported solution proposals and stakeholder demonstrations.

Technology Stack: Neo4j, Cypher, Cursor, Custom Cursor skills, Custom MCP, AI-assisted knowledge retrieval.

SVL — AI Product Discovery

Role: Senior Solution Engineer | **Duration:** 4 Weeks

Product discovery engagement exploring business requirements and opportunities for AI-enabled solutions.

- Analyzed business requirements and identified conversational AI use cases.
- Defined agent behavior and knowledge sources to support RAG-based responses.
- Supported proof-of-concept demonstrations and solution proposal preparation.

Technology Stack: Microsoft Copilot Studio, AI agents, Retrieval-Augmented Generation (RAG).

LKQ America — Product Release Development Support

Role: Senior Solution Engineer | **Duration:** 6 Weeks

React.js development support during the final development stage of a critical product release.

- Supported feature completion, defect resolution, and release of readiness.
- Collaborated with the delivery team to address application issues before release.

Technology Stack: React.js.

jkanin@gmail.com | +1-470-658-4914 | www.linkedin.com/in/jeypitch

Construction Resources — AI Image Capture and Salesforce Integration POC

Role: Senior Solution Engineer | **Duration:** 2 Weeks

Mobile image capture solution that extracts information from images and uploads the extracted data to Salesforce through AWS services and a service bus.

- Developed a proof of concept for mobile image capture and AI-based information extraction.
- Integrated extracted data with Salesforce through AWS services and service bus messaging.
- Supported technical evaluation, solution demonstrations, and proposal preparation.

Technology Stack: AI-based image extraction, AWS services, service bus integration, Salesforce.

LKQ Europe — AI Product Discovery

Role: Senior Solution Engineer | **Duration:** 4 Weeks

Product discovery engagement exploring business needs and potential AI solution approaches.

- Contributed to discovery discussions, use case identification, and technical assessment.
- Supported proof-of-concept planning and solution proposals.

AISO — AI Voice Agent Proof of Concept

Role: Senior Solution Engineer | **Duration:** 10 Weeks

AI voice agent using Amazon Nova Sonic 2 and Amazon Bedrock knowledge sources to support voice conversations informed by enterprise information.

- Developed conversational voice workflows and integrated knowledge retrieval.
- Connected the voice agent with backend workflows using AWS services.
- Supported technical evaluation, solution demonstrations, and proposal preparation.

Technology Stack: Amazon Nova Sonic 2, Amazon Bedrock, AWS services.

Senior Solution Engineer @ Relevantz Technology Services
jkkani@gmail.com | +1-470-658-4914 | www.linkedin.com/in/jeypitch

Cisco Secure Network Analytics

Role: Technical Lead

Enterprise security analytics platform supporting network visibility, threat detection, incident investigation, and response.

- Collaborated with clients on requirements, technical design, estimation, and sprint planning.
- Developed reusable React components, backend services, and public APIs documented using OpenAPI and RAML.
- Created automated test scenarios, resolved defects, and supported beta deployments and client-site troubleshooting.

Technology Stack: Java, Python, Spring Boot, React.js, AngularJS, TypeScript, Docker, Ansible, Vertica, MongoDB, Jenkins, Cucumber, OpenAPI, RAML.

BirchConnect, BirchCentral and Birch Middleware

Role: Software Programmer

Telecommunications customer and sales portals supported by SOA middleware for account management, billing, service requests, and enterprise integration.

- Developed AngularJS application components and core service functionality.
- Prepared technical designs for migration from legacy EAI services to CSI middleware.
- Evaluated technology migration options and supported defect resolution and production operations.

Technology Stack: Java, Spring, Hibernate, AngularJS, Apache Camel, JMS, ActiveMQ, Redis, MongoDB, SQL Server, Maven, Jenkins.

Responsive Media Website

Role: Technical Lead

Unified responsive website for desktop, tablet, and mobile users, supporting personalized content and advertising integrations.

- Analyze requirements, prepare work breakdowns, and coordinate sprint deliverables.
- Collaborated with onsite stakeholders to clarify functionality.
- Integrated Outbrain content and advertising data and performed analytics using Omniture and Visual Revenue.

Technology Stack: Node.js, Dust.js, SASS, IBIS, Redis, CouchDB.

Senior Solution Engineer @ Relevantz Technology Services
jkkani@gmail.com | +1-470-658-4914 | www.linkedin.com/in/jeypitch

Mobile Insurance Claim

Role: Technical Lead

Responsive application enables customers to submit lost or damaged phone claims through a shared codebase with configurable carrier branding.

- Coordinated requirements and framework design with product owners and business teams.
- Developed carrier templates, dynamic configurations, REST services, and database functionality.
- Maintained release branches and Jenkins builds, prepared deployment artifacts, and resolved production issues.

Technology Stack: Java, Spring, AngularJS, SQL Server, HTML5, CSS3, Bootstrap, REST APIs, Tomcat, Jenkins.

Medical Records Repository

Role: Lead Developer

Hospital application consolidating three healthcare products and migrating functionality from .NET to Java to manage medical record requests and delivery.

- Contributed to architecture, workflow analysis, effort estimation, and ICD-10-related use case updates.
- Developed release of information on REST services, domain models, and database structures.
- Supported testing, defect resolution, production troubleshooting, and technical documentation.

Technology Stack: Java, Spring, REST APIs, ExtJS, Oracle, MyBatis, TestNG, Ant.

Nursing Drug Handbook

Role: Lead Developer

Mobile application for iOS and Android enabling clinicians to search, sort, and annotate drug information.

- Developed and integrated backend services for mobile applications and in-app content purchases.
- Implemented Android drug sorting and annotation features.
- Supported testing, App Store submission, and onsite coordination.

Technology Stack: Java, Spring, REST APIs, Android, iOS, MySQL, SQLite, Quartz, Jenkins.

JEYAKRISHNAN PITCHAIKANI

Senior Solution Engineer @ Relevantz Technology Services
jkanin@gmail.com | +1-470-658-4914 | www.linkedin.com/in/jeypitch

Trust Banking System

Role: Senior Developer

The SOA-based wealth management platform supports equity, loans, fixed income, portfolios, and integration with existing banking systems.

- Contributed to high-level and detailed designs, application components, and data models.
- Developed general ledger functionality and integrations with portfolio, loan, investment, and NAV modules.
- Implemented SQL procedures, financial reports, and CIF/CASA interfaces with mainframe systems.
- Supported AIX production setup, code reviews, UAT, and onsite issue resolution.

Technology Stack: Java, Spring, Hibernate, Swing, EJB, DB2, JBoss, jBPM, Jasper Reports, AIX.

Healthcare Content Management System

Role: Senior Developer

Enterprise platform for capturing, storing, searching, and managing healthcare documents with controlled access and reporting capabilities.

- Prepared use cases, impact analyses, and technical designs.
- Contributed to framework decisions, CXF migration, and application enhancements.
- Coordinated offshore implementation and supported unit testing, builds, and defect resolution.

Technology Stack: Java, Spring, Hibernate, JSP, Oracle, SQL Server, CXF, Axis, ActiveMQ, Oracle Stellent, Maven, JUnit.

Enterprise Document Management System

Role: Developer

Healthcare document management application supporting secure patient information storage, retrieval, and release workflows.

- Developed business logic, integrated application.
- Created database structures and executed unit tests.
- Supported deployment and production troubleshooting.

Technology Stack: Java, Struts, JSP, JavaScript, Oracle, Ant.

Metadata Convergence Platform

Role: Developer

Media platform supporting content publishing, search, reviews, ratings, personalization, and targeted advertising.

- Developed application features and database queries.
- Prepared and executed unit tests.
- Supported user acceptance testing.

Technology Stack: Java, Hibernate, JSP, JavaScript, XML, Axis2, Adobe Flex, Blaze DS, JMS, MySQL.

Electronic Billing System

Role: Developer

Application for tracking billing transactions and generating dispute reports.

- Developed client-side and server-side functionality.
- Implemented bill-status tracking and dispute reporting.
- Supported builds, unit testing, and defect resolution.

Technology Stack: Java, EJB, Struts, JSP, JavaScript, Oracle, Solaris.

Auction Management System

Role: Developer

Application for managing auction venue bookings, participant information, and participation restrictions across multiple locations.

- Developed client-side and server-side functionality.
- Supported application builds.
- Performed unit testing and defect resolution.

Technology Stack: Java, JSP, JavaScript, Oracle.
